The Way Of The Wind

👁 92 ✓ 1 ★ 7

Chapter 1 by XOXkitkatXOX

Hello! My name is Holland, and this video is about the Way of the Wind. It's beautiful, really, if you think about it. You can make anything with it if you wanted. But people were too stupid, and didn't figure that out till' it was too late.

Too late for what, you may ask, and I can't tell you what. Maybe you'll be able to figure that out, but for now, I must explain to you, the Way of the Wind.

The Wind was always interesting to some people, and those people are the reason that we found the Way of the Wind. The Way of the Wind is, well, the Way of the Wind is...

It's not easy to explain, but I guess you could put it this way... You know the Avatar? Yeah, basically you could use the air for your will. You can bend it, and morph it into things useful to you.

I remember the day that it was discovered, well, at least it's the day that they told us about it. I was seven years old, and the second I heard of using the Wind for my will, I was obsessed.

I wouldn't stop asking my mom to buy the special gloves, but we were too broke. After that, I wouldn't stop asking my dad to get me a special glove. I was making my own gloves. The Way of the Wind had changed everything. I was getting pretty old, like flying cars.

The planet Florian loves our gloves, and has been trying to figure out how to make them. They've been negotiating with us for years, and the people of Heflin are over it.

Last year, we were invaded by the people of Florian, but we won, and we wouldn't be surprised if they ever come back. I grew up to become a scientist, and now I'm here telling you how all this works, so maybe one day, you could become a scientist!

"Wow, what a video!" Jus said, turning the holo off. He was trying to get a job as a scientist, but it wasn't working out so well. He was looking up videos for help and explaining what different kinds of scientists there were, and so far, this one was probably the most interesting.

He turned the holo back on, and followed the video.

Ding! The holo dinged, telling Jus that the video was followed, and that the creator was being called.

"Hello?" Holland answered.

"Hi! I'm Jus, and I was gonna ask you a question about becoming a scientist for the Way of the Wind... Where do I start?"

Chapter 2 by Xycronic

Holland was tired. After a long day of teaching at Heflin, he wasn't really equipped to deal with these sorts of questions. Well, he was, but he was just extremely out of it today.

He was about to finish up his research essay when he received a call. Another person had followed his video that he made several days ago. Typically, he ignored these calls, but for some reason he leaned forward and accepted the call.

"Hello?"

A young, enthusiastic voice on the other end answered, "Hi! I'm Jus, and I was gonna ask you a question about becoming a scientist for the Way of the Wind... where do I start?"

"Oh, um, I live in New Tokyo."

"Ah, well, I know a friend of mine there. Maybe he can help you with the test. He lives here... and he should be able to help you after you've finished the test."

Jus stared excitedly at the screen, watching as an address showed up on the holo. "Great! Thanks so much!" He breathlessly turned off the holo and copied the address down onto his cellular device. Jumping out of his seat, he ran out the door into the busy streets. Activating his GPS, he began following the device...
